- Tariff programming
- Time control and synchronization
- Changeover from summer- to wintertime
- Data downloading to peripherals
- Password management
- Service/maintenance functions
- Equipment and facility monitoring
- Capacity, level and zone counting
- Occupancy control
- Alarm management
- Alarm ticket control
- Season parker management
- Statistics and reports

General

Professional car park operation starts with the multifunctional Orion Management Station PM. It provides you with all tools for an efficient and profitable management and monitoring of a modern car park. System and facility monitoring, client and staff data administration, revenue collection and management, data processing and statistics, configuration and tariff programming are only a few of the many possible functions and tools. High-end components and the easy to understand user interface guarantee dependable operation.

Operating system/software

The operating system OS9 and the outstanding application software make the Orion Management Station PM to a true real-time working multi-user system. Several operators may carry out different jobs simultaneously, each at his/her own workplace, without interfering each other. The comprehensive software is grouped in more than 10 main menus. The function of the Orion Management Station PM is based on the configuration principle, i.e. several hundreds of function parameters are set on site or by modem to meet exactly the customer's requirements.

Access hierarchy/security

Any access to the system or a menu point is protected by password and is chronologically recorded. Programs, files and transaction data are stored in a protected memory. An additional battery backup prevents loss of data. In the event of a power failure the Orion Management Station PM starts the automatic reboot procedure.

Standard

- Stainless steel cabinet, RAL 5017
- 32 bit Motorola industrial computer
- SCSI controller

Optional function packages

- VDU with keyboard
 - Statistic/ event log printer
 - Modem for remote support and software transfer
 - Ethernet interface TCP/IP
