

ORION

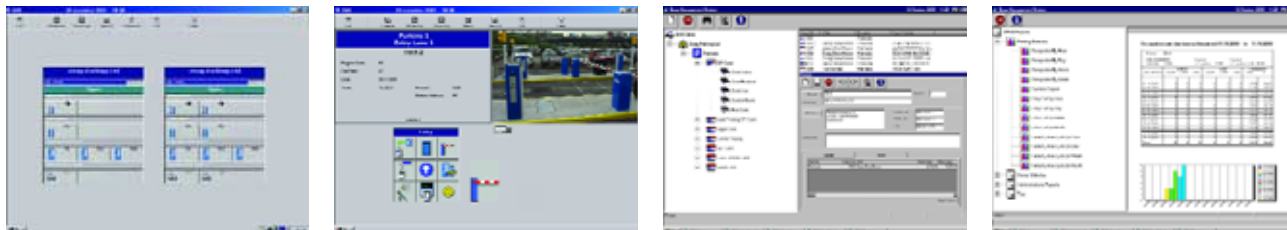

From our range of systems:

Management System ZMS

Orion. The intelligent parking solution.

Orion is the best parking solution today, with unique design, comprehensive software, high user-friendliness and global support. Orion permits ideal management of your precious parking space. The system has a modular structure. It can be configured and extended to suit your needs, providing optimum solutions for every application – from a small car park to a major project.

General

The Zeag Management System ZMS sets new standards for efficient and profitable parking and revenue control - for single car parks and demanding network solutions. ZMS combines comprehensive functionality, reliability and user-friendliness. The fact that each of the Zeag peripherals has their own central processing unit guarantees the highest possible system availability and real-time communication. The system has a modular structure and is scalable. Thanks to this open system architecture, the Zeag Management System grows with your requirements, from a single PC solution up to a client-server solution.

Operating system/software

Microsoft Windows and Microsoft SQL are the base for the ZMS software package. The software is structured in comprehensible modules. The easy to understand graphical user interface and the new database management tools create the environment for an efficient operation. Every access to the system is protected by password request and all events are chronologically logged.

Main functions

- System management
- Parameter configuration
- Equipment configuration and administration
- Season parker and contract management
- Data media management
- Revenue collection and management
- System time control and synchronization
- Tariff programming
- System and facility monitoring and control
