

ORION

From our range of systems:

ValiMate™

Orion. The intelligent parking solution.

Orion is the most innovative system to manage your parking space efficiently. With Orion ValiMate™, parking fees can be validated easily and securely.

- More than 250 validation accounts
- Multiple validations per ticket
- Electronic security encoding
- Thermal printing for each validation
- Easy – fast – safe

Zeag-Orion™ provides efficient, profitable parking facility management.

General

With the Orion ValiMate™ you can easily validate parking fees. ValiMate™ is quick and secure. The validation information is encoded electronically on the magnetic stripe of the ticket and is also printed on the ticket. When payment is made at the Zeag-Orion™ Payment Station, or at the Zeag-Orion™ Cashier Terminal, the price reduction is displayed to the customer. The remaining fee can be paid in cash or by credit card or «electronic purse». Additional rebate tickets can also be used. All validations are statistically registered and analyzed per account by the Zeag system.

Validations

- Fee reduction using a different tariff table
- Fee reduction as a percentage of the fee due
- Fee reduction as a flat value discount
- Fee reduction as a reduction in the amount of effective parking time

Features

- Access to more than 250 validating accounts
- Up to ten validations per ticket
- Thermal printing of each validation on the ticket

Operating controls and housing

A compact, stainless steel housing with an aluminum front panel affords a minimal footprint, thereby maximizing counter space. All operating controls are ergonomically designed, user-friendly and can be custom labeled. All components are easy to maintain.

Operating controls

- LED: invalid validation
- LED: valid validation
- LED: power on/off
- Infrared interface
- Default button «Validation 1 – 4» (Optional)

Security

The integrated Zeag universal card-handling device (UCD) encodes all relevant information on the magnetic stripe of the ticket. The segmental evaluation of data blocks and error correction logic guarantee high operational security and reliability. Fraudulent tickets, or tickets with false or invalid data, are detected and rejected. The ValiMate™ is fitted with a security lock to resist tampering and can be activated from external equipment, such as a cash register.

Options

- Up to four default buttons for validations
- Infrared programming interface

Technical Data

Environmental temperature:

0 °C...+40 °C

Power supply (external):

Primary: 110/240 VAC, 47...63 Hz, 1.6 A

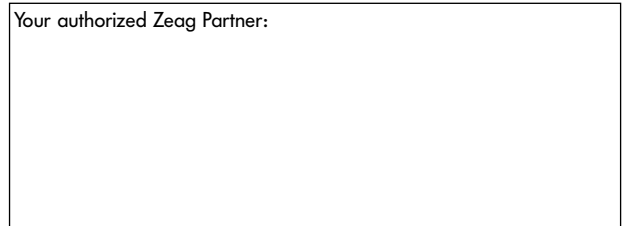

Secondary: 24 VDC, 2.5A

Weight: 5 kg (without external power supply)

Dimensions (W x H x D): 160 x 140 x 275 mm
